

# Programa Arquitetura e Engenharia públicas

O Programa Arquitetura e Engenharia Públicas, da Prefeitura Municipal de Belo Horizonte, iniciou suas atividades em 2004, propondo suprir a lacuna da assessoria técnica à moradia de populações hoje não atendidas, seja pelo mercado formal da construção civil, seja pelos programas habitacionais geridos pelo poder público.

A participação do Escritório de Integração do Curso de Arquitetura e Urbanismo da Puc Minas estruturou-se através da criação do Núcleo de Arquitetura e Engenharia Públicas, com a participação de professores e estagiários do Departamento de Arquitetura e Urbanismo e do Departamento de Engenharia Civil.

The image shows an architectural floor plan of a house. The main drawing includes labels for the BANHO (Bathroom), COZINHA (Kitchen), SALA (Living Room), QUARTO (Bedroom), and GARDEN. There is also a note indicating a 'Porta pivotante' (Swinging door) between the BANHO and the BANCO. A separate section on the right provides a detailed view of the BANHO area, showing fixtures like a sink, toilet, and shower. This detailed view is annotated with the following text:

- Vaso de pedestal.
- Rua de pedra.
- Porta pivotante.
- Porta pivotante a dobrar.
- Porta pivotante a comutar.

At the bottom left, there is a small diagram of a room with dimensions: 3.00m by 2.50m, and a note: 'Novo projeto só do banheiro permanecendo salvo o da sala por ser menorável.'
